

Coconut Rice

4 servings

20 minutes

INGREDIENTS

1 cup of rice

1 cup coconut milk

1 cup of water

Salt to taste

DIRECTIONS

1. Follow the typical rice recipe but instead of using the regular 2:1 ratio of water to rice, substitute half of the water with coconut milk. [Adjust the water-to-rice ratio if your rice cooker requires a different proportion.]
2. Let it cook for approximately 20 minutes or until fully done.
3. Remove it from the heat and cover it with a kitchen cloth, allowing it to rest for a few minutes.
4. The result is a delightful surprise of fluffy and exceptionally flavorful rice that goes beyond your usual expectations!

NOTES:

Pair this delectable rice with the Stew Beans recipe featured in last month's newsletter, and you're in for a truly satisfying meal! Enjoy!
